

EPR Canada -- Extended Producer Responsibility (EPR) Report Card, 2011

Appendix A – Provinces and Territories Intentions to Implement EPR Programs for Canada-wide Action Plan Phase 1 and 2 Materials

This table summarizes information provided by Canada's ten provinces and two of Canada's three territories in their responses to Question # 2 in the survey questionnaire (Progress on commitments to the CCME Canada-wide Extended Producer Responsibility Action Plan) describing their intentions to manage materials scheduled for program implementation between 2012 and 2015. Comments describing future plans without reference to a particular year of program implementation are included in the 'General Comments' column.

Jurisdiction	Intention to Implement in				General Comments
	2012	2013	2014	2015	
British Columbia	- Large appliances, tools, medical devices, lighting equipment, toys, leisure and sports equipment, monitoring and control instruments, IT and telecommunications equipment, accessories		- Residential packaging and printed paper	- Intention to implement programs per CAP stated in Ministry's 2012/2013 and 2014/2015 Annual Service Plan Objectives 2.2 and 4.3	
Alberta					- Commitment to PPP stewardship in Too Good to Waste Strategy - Reviewing WEEE program for potential expansion
Saskatchewan					- Implementation of PPP regulations in foreseeable future - No progress for CAP Phase 2 materials
Manitoba					- Government approval is in progress to initiate work on Phase 2 materials
Ontario					- Consultation on additional material designations as part of WDA review
Quebec	- Fluorescent lamps - Batteries - Phase 1 WEEE: Computers, peripherals, televisions, telephones/cell phones, AV			- Regulate at least two of C&D materials, textiles, appliances, end-of-life vehicles within two years	- Plans to expand WEEE program to include Phase 2: audio, video, cameras, accessories - Plans to designate tires in 2012 and transition to EPR
New Brunswick					- Completed consultation on regulatory amendments to electronic products and automotive products; regulations drafted but amendments to Designated Materials

Jurisdiction	Intention to Implement in				General Comments
	2012	2013	2014	2015	
					Regulation outstanding - PPP and MHSW not yet initiated - CAP Phase 2 not yet initiated
Nova Scotia					- Working on establishing an EPR policy framework to incorporate the products, materials and product categories set out in CAP
Prince Edward Island	- Paint and containers				- Exploring Canada-wide program for mercury lamps with EC and 6 provinces that do not have EPR programs for these products - Will transition CAP Phase 2 materials from stewardship to EPR where regional and/or national standards exist and where a qualified framework exists - Participating in CCME End of Life Vehicle Task Group (ELVTG) assessing the Automotive Recyclers of Canada (ARC)
Newfoundland				- Developing EPR policy framework for used oil, electronic waste, mercury containing lamps and household hazardous and special waste with regulations expected by 2015	- EPR policy for PPP dependent on developing infrastructure - EPR policies regarding CAP Phase 2 products will be considered by Multi Materials Stewardship Board and Department of Environment and Conservation
Northwest Territories					- Reviewing Beverage Container Program including possible transition to EPR - Feasibility study to consider WEEE under EPR implemented in 2012
Yukon					- Reviewing input from consultations on CAP Phase 1 materials and EPR regulation
